Application/Control Number: 10/084,018 Page 2

Art Unit: 1652

Claims 2-10, 13-29, 46-55, and 57-61 have been canceled.

Claims 1, 11, 12, 30-45, and 56 are at issue and are present for examination.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1 and 56, drawn to serine carboxypeptidases, classified in class 435, subclass 212.
- II. Claims 11, 31, 32, 34, 36-43, drawn to antibodies to serine carboxypeptidases and methods of making, classified in class 424, subclass 185.1.
- III. Claim 12, drawn to polynucleotides encoding serine carboxypeptidases, classified in class 536, subclass 23.2.
- IV. Claims 30 and 44, drawn to methods of detecting CPEPT in vitro, classified in class 435, subclass 23.
- V. Claims 33 and 35, drawn to methods of detecting CPEPT in vivo, classified in class 424, subclass 139.1.
- VI. Claim 45, drawn to methods of purifying CPEPT, classified in class 435, subclass 212.

The inventions are distinct, each from the other because of the following reasons:

Application/Control Number: 10/084,018 Page 3

Art Unit: 1652

The proteins of Group I, the DNA of Group III, and the antibody of Group II each comprise a chemically unrelated structure capable of separate manufacture, use and effect. The DNA comprises a nucleic acid sequence, and the proteins of Groups I and II each comprise an unrelated amino acid sequence. The DNA has other utility besides encoding the proteins of Group I such as a hybridization probe and the proteins can be made by another method such as isolation from natural sources or chemical synthesis.

Inventions III and IV-VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the antibodies can used for detecting the protein or purifying the polypeptides of Group I.

The proteins of Groups I or DNA of Group II are unrelated to the method of Groups IV-VI as they are neither used nor made by the methods of Groups IV-VI.

The methods of Groups IV-VI are independent as they comprise different steps, utilize different products and produce different results.

Application/Control Number: 10/084,018 Page 4

Art Unit: 1652

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rebecca Prouty, Ph.D. whose telephone number is (703) 308-4000. The examiner can normally be reached on Monday-Friday from 8:30 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapu Achutamurthy, can be reached at (703) 308-3804. The fax phone number for this Group is (703) 308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196. Hebrera King
